

# Ethan Davis

## Senior Systems & Mobility Engineer

39655 Bristol St. Livonia, MI. 48154 | (614)-424-2159 | edavis@bonappel.com

## Professional Summary

Highly experienced and results-driven IT professional with over 14 years of experience in various roles including Systems Administration, Desktop Engineering, and Mobility Management. Proven ability to support and maintain network infrastructure, administer accounts in Active Directory and Azure Active Directory, and implement complex software and hardware solutions. Adept at providing technical support in a fast-paced environment and formulating strategies to enhance organizational IT capabilities. Currently pursuing the Microsoft AZ-104 certification and holds a JAMF Certified Professional certification.

## Professional Experience

**Onsite Engineer Tier II** | Skynet Innovations | Farmington Hills, MI *February 2022 - Present*

- Managed the 24/7 operational stability of network and communication equipment for multiple municipal and private clients, maintaining 99.9% uptime for critical services.
- Successfully completed a Hybrid Deployment of Intune from start to finish for a new client, including configuring Active Directory Sync components and troubleshooting deployment and Firewall issues.
- Completed major deployment projects, including a refresh of over 250 laptops and desktops for City Offices, Police and Fire Departments.
- Assisted Project Engineers with a project to migrate network infrastructure, replacing Extreme switches utilizing Fabric Attach for VLANs with a new E-LAN connected network using HPE Aruba switches.
- Successfully remediated and restored a Fortigate HA pair that was initially half-bricked and outdated by three major versions.
- Diagnosed and resolved complex networking issues on Extreme switches and APs within the Extreme Campus controller, including troubleshooting Port Flapping and Fabric Attach.
- As the Primary On-Site Engineer for the City of Taylor, gained proficiency in Avaya, Fortigate, Horizon VDI, and Verkada Cloud, creating comprehensive documentation for these systems.
- Collaborated with the city's GIS administrator to modernize a legacy 32-bit application and perform maintenance of Linux systems hosted on Google Cloud Platform (GCP).

- Managed day-to-day user creation and role-based access in BS&A, leading the OS upgrade project from Windows Server 2016 by spinning up new VMs and migrating data.
- Administered Google Workspace for the City of Taylor, handling user management and access control.
- Managed the full lifecycle of Mobile Desktop Computers (MDCs) in police vehicles, acting as a technical liaison between the cities and CLEMIS, and managing Cradlepoint devices.
- Maintained and administered firewalls (SonicWall and WatchGuard), including managing firewall rules, patching, and troubleshooting VPN tunnels.
- Performed major patch remediations on VXrail systems, upgrading them from version 7 to 8.

**Desktop Engineer/Manager of Mobility** | Rite Rug | Columbus, OH *May 2018 - February 2022*

- Directed the full mobile device lifecycle for 1600+ endpoints across 60 cost centers, including procurement, deployment, and cost-saving bill auditing.
- Executed M365/Active Directory administration and permissions management.
- Maintained existing patch management systems for all endpoints and made new deployment components as needed.
- Led projects to increase Helpdesk Efficiency, documentation initiatives, and lowered Mobility Costs Year over Year through Lean management principles.

**Mobility Helpdesk / Client Support Manager** | The Hastings Group | Columbus, OH *April 2014 – May 2018*

- Provided hands-on support for hardware, software, and mobile device issues.
- Served as a Client Support Manager, ensuring high levels of client satisfaction.
- Created and delivered new hire training and quality assurance programs.

**Supervisor / Trainer** | Teleperformance | Columbus, OH *December 2011 - April 2014*

- Supervised and trained teams on various projects, including Tier 3 technical support for the Verizon Fios Support project.
